Evidence and Evolution The Logic Behind the Science

In this rich and wide-ranging book, Elliott Sober investigates general questions about probability and evidence and shows how the answers he develops to those questions apply to the specifics of evolutionary biology. Drawing on a set of fascinating examples, he analyzes whether claims about intelligent design are untestable; whether they are discredited by the fact that many adaptations are imperfect; how evidence bears on whether present species trace back to common ancestors; how

REVIEW OF ELLIOTT SOBER'S EVIDENCE AND EVOLUTION THE

When hominid evolution is addressed in a evolution class, molecular evidence is presented on the timing of the human/chimp split, and more recently the human/Neanderthal split. Then the evidence on hominid evolution, with all its extinct species, remains entirely controversial with nearly as many phylogenies as there are academic devotees of hominid phylogeny. Sober's focus in this chapter

Evidence and Evolution: The Logic Behind the Science examines the philosophical foundations of the statistical arguments used to evaluate hypotheses in evolutionary biology, based on simple examples and likelihood ratios. The difficulty with reading the book from my/a statistician's perspective is the reluctance of the author to engage into model building and even less into parameter
