As a tribute to Joost Lowyck, professor educational technology at the K.U.Leuven, eminent scholars from around the globe have contributed to a far reaching analysis of complexity in learning environments from a cognitive perspective. Authors summarize what is known now about complexity and make specific suggestions for educational practice and for future research on complexity. The different contributions in the several chapters discuss theoretical accounts and empirical findings about [Handling Complexity in Learning Environments: Theory and ...](#)

Clark's interest is in the performance of people and technology in culturally diverse, multinational organizations where complex knowledge work is accomplished in a constantly changing environment. He is the author of more than 150 published books, chapters, articles, and monographs, including, most recently, *Learning from Media: Arguments, Analysis, and Evidence* (Information Age Publishing)

Abstract. A learner-centered approach is a central feature
of instruction based on a constructivist learning model.
However, there is some confusion regarding the
requirement for behavioral activity as a prerequisite for a
learner-centered environment.

The Complexity Of Learning A learning network can only
be successful if it retains the ability to interact with its
environment. Without some sort of environmental
awareness, the network is unable to respond and it may
ultimately result in degradation. With human learning
networks, it is difficult to draw a comparison. To me, it
seems like the environment is the workplace, and the
network

Learning environment - Wikipedia

Learning environment can refer to an educational
approach, cultural context, or physical setting in which
teaching and learning occur. The term is commonly used
as a more definitive alternative to "classroom", but it
typically refers to the context of educational philosophy or
knowledge experienced by the student and may also
encompass a
