Integral, or structural, foams are one of the most
remarkable materials that have been developed over the
last fifteen years. As with all rapidly growing fields, the
terminology seems to have grown even faster. Thus there
are two names for the material structure itself. In the
United States and in

Since the sandwich-like structure of the integral foams
resembles that of natural wood, the foams are often
referred to as artificial wood or plastic wood, thereby
emphasizing not only the formal structural similarity of
these materials, but also one of the main functional
applications of integral foams - replacement of wooden
articles in various fields of engineering and construction.
