Software Architecture Quality Attributes Management

In this report, we define software quality, introduce a generic taxonomy of attributes, discuss the connections between the attributes, and discuss future work leading to an attribute-based methodology for evaluating software architectures.

Quality of Software Architectures and Software Quality

The goal of software engineering is to achieve high-quality software in a cost-effective, timely, and reproducible manner. Advances in technology offer reductions in cost and schedule, but their effect on software quality often remains unknown.
