In the present book we study the pullback equation for differential forms  $(g) = F$ , namely, given two differential  $k$ -forms  $F$  and  $g$  we want to discuss the equivalence of such forms. This turns out to be a system of nonlinear  $(k+1)$ -order partial differential equations in the unknown map  $\varphi$ . The problem that we study here is a particular case of the equivalence of tensors which has
